

Настройка роутера.

Переходим на IP адрес роутера. Появляется окно с вводом **логина/пароля от роутера**, указываем там **admin**.

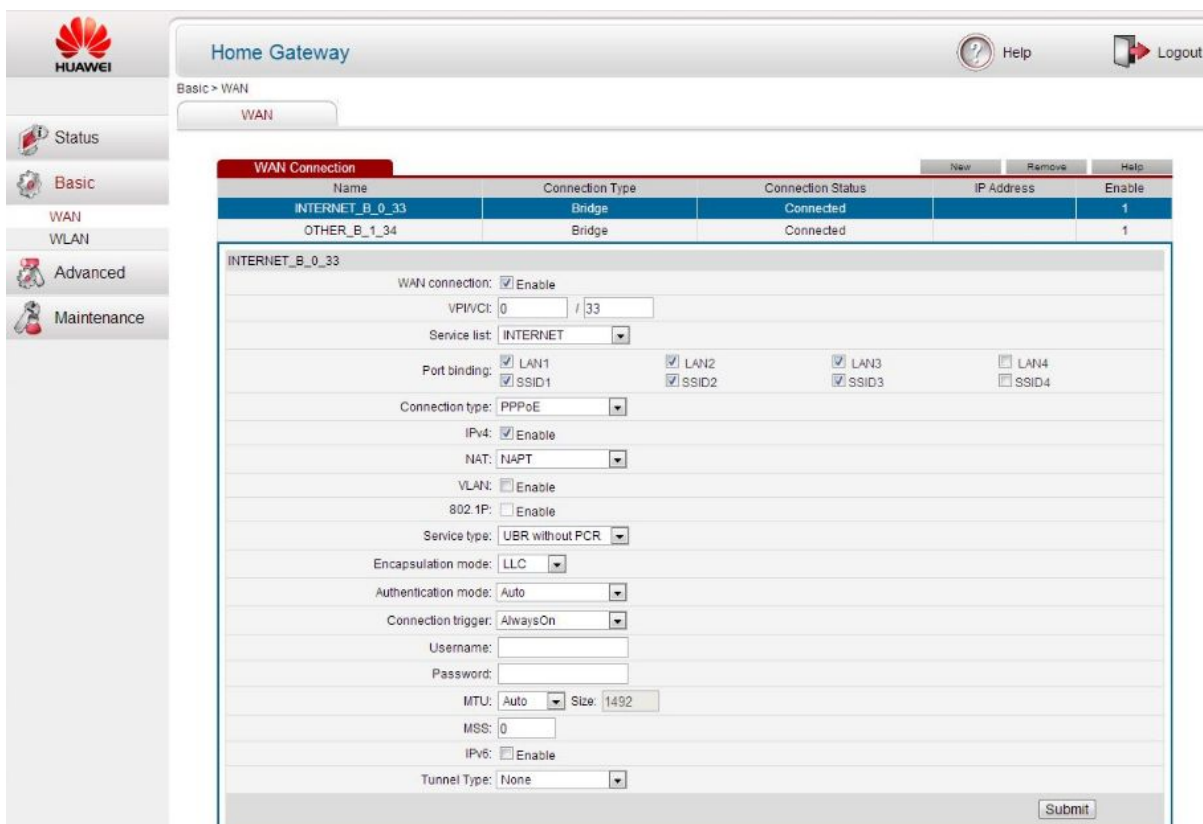

Home Gateway

Username:

Password:

 Please enter your username and password.

Далее открывается меню роутера. Где необходимо слева выбрать пункт **Basic** и подпункт **WAN**. Затем выбрать имя подключения **INTERNET**. После чего установить **Connection type - PPPoE** и указать **Логин/Пароль** по договору. Нажимаем кнопку **Submit**.

Home Gateway

Basic > WAN

WAN

Далее настраиваем wi-fi сеть.

Выбираем пункт **WLAN** в разделе **Basic**.

Здесь указываем необходимое **SSID** (название сети), устанавливаем галочку **SSID - Enable**. Далее устанавливаем шифрование **WPA-PSK** и указываем **WPA pre-shared key** (ключ сети). Внизу нажимаем на кнопку **Submit**.

The screenshot shows the configuration page for a Huawei Home Gateway. The interface is in Russian. The left sidebar contains navigation options: Status, Basic, WAN, WLAN (highlighted with a red box and arrow), Advanced, and Maintenance. The main content area is titled 'Home Gateway' and shows the configuration path 'Basic > WLAN > Private SSID'. There are two tabs: 'Private SSID' and 'WLAN Filtering'. The 'Private SSID' tab is active. At the top, there is a checkbox for 'Enable WLAN' which is checked. Below this is a section titled 'Wireless Settings' with a 'Help' button. The settings include: SSID index (SSID1), SSID (HG532e-1), Maximum number of accessing devices (8), SSID (unchecked), Security (WPA-PSK), WPA pre-shared key (masked with dots), WPA encryption (AES), WPS (checked), and WPS mode (PBC). A 'Submit' button is located at the bottom right of the settings area.

Wireless Settings		Help
SSID index:	SSID1	
SSID:	HG532e-1	*
Maximum number of accessing devices:	8	*
SSID:	<input type="checkbox"/> Enable	
Security:	WPA-PSK	
WPA pre-shared key:	*
WPA encryption:	AES	
WPS:	<input checked="" type="checkbox"/> Enable	
WPS mode:	PBC
